This is Fig. 44 referred to on page 3

A taxon (WTH 323, probably the same as ML 546), which can be found Northeast of Viesca, at La Cuchilla near highway 40 mostly growing in rock cracks. It belongs to the *M. lasiacantha* Group and it very likely can be identified with *M. gasseriana* Boedeker, which was reported from southwest Coahuila.
