| 6. The search for BIMS by Tony Irons | 136 |

Contents are continued on the inside back cover

Front cover: *Turbinicarpus beguinii* ssp. *hintoniorum*, a very charismatic member of the genus. It grows in the state of Nuevo Leon, Mexico and was described by Anton Hofer in 2000 in SUCCULENTES, having been discovered in 1997. John Ede refers to this species on page 119 in his article introducing Turbinicarpus as an 'allied genus'.
